REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach A method for producing a two-piece face component for assembly with an aft-body of a golf club head, the face component having an interior surface as well as an exterior surface, the method comprising : Regarding Claim(s) 1, : forming a strike face insert separate from the cast face inserting the striking face insert into the opening of the cast face cup simultaneously forming the face cup to the dimension complementary to the aft-body, and securing the striking face insert in the opening of the cast face cup to form an assembled face component, wherein the return portion of the assembled face component includes a thin walled flange with a thickness of no more than 0.060 inch; Regarding Claim(s) 17, forming an opening in the front face of the face cup; forming a striking face the striking face insert separate from the face cup, insert being composed of a titanium alloy material ; inserting the striking face insert into the opening of the cast face cup while simultaneously forming the face cup to a dimension complementary to the aft-body, machining the exterior such that the striking the face cup are flush, welding the striking face insert to the face cup, the welding occurring on the interior surface of the face surface of the face component face insert and the front face of component to form an assembled face component; and securing the assembled face component to the aft-body, wherein the return portion of the assembled face component includes a thin walled flange having a thickness of no more than 0.050 inch; and Regarding Claim(s) 19, forming an opening in the front face of the face cup;

Art Unit: 3726

forging a striking face insert from a titanium alloy material; swaging the forged striking face insert into the opening of the cast face cup while simultaneously forming the face cup to a dimension complementary the aft-body, to machining the exterior surface of the face component such that the striking face insert and the front face of the face cup are flush, welding the forged striking face the welding occurring on the component to form an assembled face insert to the face cup, interior surface of the face component, and securing the assembled wherein the face component to the aft-body, return portion of the assembled face component includes a thin walled flange having a thickness of no more than 0.050 inch in combination with the other elements of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
